Who:

Glenn R. Gibson, PhD, is Professor of Food Microbial Sciences and Head of the Food and Microbial Sciences Research Unit at the University of Reading, Reading, United Kingdom. His previous posts were as Head of Microbiology, Institute of Food Research, Reading, and Research Scientist at MRC Dunn Clinical Nutrition Centre, Cambridge. He has published more than 300 research articles, 10 patents, and 5 books on gut microbiology. He gives an average of 40 science lectures at international conferences each year and sits on five advisory panels in Europe and the United States, two of which he chairs. His main research interest is the role of human bacteria in health and disease.

Berthold Koletzko, MD, is Professor of Pediatrics and Head of the Division of Metabolic Diseases and Nutritional Medicine at Dr. von Hauner Children's Hospital, University of Munich Medical Center, Munich, Germany. His research interests include metabolism and nutrition in childhood, pregnancy and lactation, metabolic diseases, and clinical nutrition. He is the coordinator of the European Childhood Obesity Group and the Early Nutrition Programming Project (www.metabolic-programming.org). Dr. Koletzko is the author or co-author of 603 publications, including 215 original papers, 226 reviews, 148 book chapters, and 19 books. He serves on the editorial boards of numerous national and international journals, including Clinical Nutrition (Section Editor, Pediatrics) and Current Opinion in Clinical Nutrition and Metabolic Care (Section Editor, Pediatrics).

Philip M. Sherman, MD, FRCPC, is Professor of Pediatrics, Microbiology, and Dentistry at The Hospital for Sick Children, University of Toronto, Ontario, Canada, where he has been on the faculty since 1984. Dr. Sherman is the immediate Past-President of the North American Society for Pediatric Gastroenterology, Hepatology and Nutrition and a Past-President of the Canadian Association of Gastroenterology. He is the recipient of a Canada Research Chair (tier 1) in Gastrointestinal Disease (2001-2015). His research program is currently funded by the Crohn's and Colitis Foundation of Canada and the Canadian Institutes of Health Research. Dr. Sherman serves on the Science Advisory Board of Antibe Therapeutics. His research interests focus on epithelial cell signal transduction responses to pathogenic, commensal, and probiotic bacteria, and their products.
